

A DEVICE FOR CONTROLLING AN INTERNAL COMBUSTION ENGINE  
WITH A VARIABLE VALVE TIMING SYSTEM

5

ABSTRACT OF THE DISCLOSURE

10 A device for controlling an internal combustion  
engine with a variable valve timing system is provided.  
While the piston descends just after the combustion in  
the cylinder, the intake valve is opened by the variable  
valve system for the intake valve such that the intake  
15 air is supplied into the cylinder from the engine intake  
system.
